

Sales Trend Analysis: SQL Script and Results

SQL Script:

```
-- Monthly Sales Trend Analysis (SQLite version)

SELECT
    STRFTIME('%Y', order_date) AS order_year,
    STRFTIME('%m', order_date) AS order_month,
    SUM(amount) AS total_revenue,
    COUNT(DISTINCT order_id) AS order_volume
FROM
    online_sales
GROUP BY
    order_year,
    order_month
ORDER BY
    order_year,
    order_month;
```

Sample Results Table:

order_year	order_month	total_revenue	order_volume
2023	01	12350.00	108
2023	02	14210.00	125
2023	03	11980.00	97
2023	04	16540.00	133
